IRIS FOR YOUR GARDEN

GREETINGS to friends and customers who missed our catalog last year.

Because of illness I was compelled to sell the Garden at Grandview and move to Sunnyside to be near the hospital. I have had 51 blood transfusions since then. Doctor says I have to keep taking them so do not let the anemia bug bite you.

I brought some iris to Sunnyside in the fall of 1950. In 1951 requests for catalogs and some orders came from old catalogs even though there was no advertising put out. The result--I planted some more stock and now have a small number of choice plants to sell.

I especially wish to thank the writers of the kind letters they wrote me last year. They meant a lot to me, L. W. Warner.

All plants are guaranteed true to name, disease free, of good blooming size and to reach you in good growing condition. They will be freshly dug because they start growing quicker than stock that has dried out. Shipment will begin in early July and if for any reason we cannot fill all of your order your money will be promptly returned. Shipment will be by prepaid mail.

Please name some acceptable substitutes we can send if some stock runs out. If your order is less than \$3.00 please include 25¢ for postage and packing.

If you live east of the Mississippi River please add 5¢ per plant for postage.

Washington residents please add 3% Sales Tax.

No C. O. D. 's Please. They cost money.

ABOUT AWARDS

The American Iris Society gives awards to deserving new irises each year as voted by its Judges. Among these awards is the Dykes Medal which is the highest award any iris can receive. Award of Merit irises are very good ones and the Dykes Medal winners are chosen from them. The Honorable Mention irises are candidates for the Award of Merit award.

Printing costs are very high now and by making this simple price list we can pass the savings on to you in lower prices for some plants. The colored catalogs are wonderful but Oh! how they cost.

A. B. C'S. FOR GROWING TALL BEARDED IRIS

Get your plants from a reliable grower in early summer. Spread the roots after trimming away broken ones, and cover the rhizomes about half an inch deep. Press the soil firmly over the roots and water thoroughly. Keep the soil loose and moist until plants are growing nicely. Do not use fresh manure or fertilizer directly in contact with the roots. Plant in good garden soil that is well drained. Iris are usually free from diseases and pests but if you do have trouble write to your experiment station. A good flower magazine with question and answer department is a lot of help. If you want the best there is on iris join the American Iris Society and get four big bulletins a year on all phases of iris interest.

Address: The Secretary, American Iris Society, Franklin Road, Brentwood, Tenn. Dues are \$3.50 per year.
